

# PANDEMIC FLU AND YOU

## What Is the Government Doing to Prepare?

### What is the federal government's role in pandemic influenza preparedness planning?

- Coordinate national and international surveillance of avian influenza and pandemic influenza
- Fund development of pandemic flu vaccines
- Support enhanced vaccine production capacity within the country
- Support increased production of antiviral drugs
- Stockpile flu vaccines and antiviral drugs in preparation for a flu pandemic
- Lead communication with states and other public health agencies regarding pandemic influenza
- Provide legal advice and policy guidance on pandemic response activities
- For more information on federal pandemic response planning visit:
